

EatsCRAP....it's back! The MSD fixer
The World is Saved !

EatsCRAP - The Bio Supercharger

EatsCRAP is simply microbes and bacteria that eat poop and paper. It comes in dissolving 2 oz baggies that have literally tens of billions of hungry little mouths that eat your STUFF! These are the same bacteria that we have in our gut.....just more of them....lots more!

WHO USES IT and WHY ? Mostly the commercial marine industry work boats and anyone who uses a [Type II Marine Sanitation Device \(MSD\)](#) for treating their sewage wastes. Any boat that has a [toilet](#) MUST have an MSD type 1, 2 or 3. The USCG inspects these for proper operation. EatsCRAP keeps it moving and purring along like our own micro-biome!

MSD's can get VERY stinky VERY FAST, if they get out of balance. Think outhouse stinky....or even worse . Here's the FIX in a baggie. EatsCRAP is a perfect product....just buy it and throw it in the toilet.

EatsCRAP BIO BOOSTER will instantly increase system capability. Revitalizes your system QUICKLY by introducing tens of billions of hungry little mouths whose destiny is to EAT POOP & PAPER! huh? wtf WOW!

All [Type II Marine Sanitation Devices \(MSD\)](#) are designed and engineered to be as efficient and maintenance-free as possible, yet still depend on naturally occurring microbes to digest the solids, sludge and to control odors.

While the number of these microbes (bugs) may be sufficient under normal and ideal conditions - there simply are not enough of them to deal with upset conditions. When you have "BUG or system KILL" in the MSD due to harsh cleaning chemicals, a bunch of antibiotics OR have an overload OR underload condition-the remedy is NOT to feed the natural population with dog food or even enzyme additions. Think about it! The Answer: EatsCRAP MORE BUGS - more hungry mouths-

Keep your System Healthy and Eliminate Odors!

A handful of EATScrap.

EATScrap™ supplies this answer by having the highest concentration of specifically blended natural microbes available for the marine industry. With this massive reinforcement of microbes - an out of balance, overloaded or just plain "soured" MSD will get back to peak balance and efficiency-FAST. Of course, you also have to add some common sense. Don't throw the EatsCRAP kids in an acid pool.

EatsCRAP **Microbial Activated Sewage Treatment (M.A.S.T.)**

Got a stinker? Here's a fix to keep you out of the MSD

[EatsCRAP dissolving baggies: #EC101 EatsCRAP Bio Booster](#)

Get a 50,100 or 200 pack of EatsCRAP today& let the party begin!

They love the CACA.

Is this a GREAT PRODUCT? Yeah....we sell it to you to flush it down your [toilet](#).
